PROJECTS

Weather App — React.js, OpenWeather API

- Built a weather application that fetches real-time data from the OpenWeather API and displays current temperature, humidity, wind speed, and weather conditions.

Major Project (In Progress) — MERN Stack

- Built a travel property listing platform with full CRUD operations.
- Integrated Cloudinary for secure and optimized image storage.
- Enhanced UI responsiveness using Bootstrap and implemented clean, structured REST APIs.

Campus Connect — React, Node.js, Express, MongoDB

- Users can view event details and book two types of tickets: instant free tickets and paid tickets issued after successful payment.
- Each ticket includes a scannable QR code for entry verification.
- Backend developed with Express and MongoDB to manage bookings, events, and payment flow.

ACHIEVEMENTS & CERTIFICATIONS

- Completed coursework and self-driven MERN stack projects.
- Developed a platform for managing college events with secure ticket booking during HackoVerse 2025.
